**BoomerTimes & SeniorLife** *Extraordinary Advertiser of the Month*

[Publisher's Note: We have so many loyal and dedicated advertisers who have a special mission as we do to reach the Boomer and Senior population to enhance their lives. Here's our monthly feature to acquaint you with these "shining stars" of *BoomerTimes & SeniorLife*.]

**techprodigy™**

Technology is an inescapable fact of life in the 21<sup>st</sup> century. Whether we like it or not, we now live in a world of cell phones, digital cameras, wireless routers and programmable video recorders. And this is a good thing, because it means we now live in a world where it's easier than ever to be in touch with loved ones, to record special occasions for posterity, to access information easily and to shop and seek out entertainment when it's most convenient for us to do so.

For the average reader of *BoomerTimes & SeniorLife*, however, all of this technology can sometimes seem a little difficult to keep up with. That's where Anthony Markus and his team of *techprodigy™* Professional Mobile Technicians can help.

Anthony, a Fort Lauderdale-based entrepreneur and longtime fan of all things hi-tech, saw a niche for *techprodigy™* when he realized there were only two alternatives for people seeking help with their computers—they could deal with a big, nationwide, impersonal corporation or they could call a fly-by-night guy with bad communication skills who typically arrived a few hours late in a car on the verge of falling apart.

The key to providing real help, he decided, was to keep things both accessible and professional. So last year, Anthony bought a small fleet of cars and hired the most friendly, patient, trustworthy and knowledgeable people he could find to pilot them. People with an equally deep understanding of how electronic things work and how intimidating they can be for others.

*techprodigy™*'s Professional Mobile Technicians are available at your beck and call, able to provide onsite support in your home. If you have a new computer that needs setting up, they can do it. If you have an old one that needs fixing, they can do it. If you are thinking about buying something tech-related but have no idea where to start, they can help you with that too.

The idea is to give everyone a chance to take advantage of what technology has to offer. Emailing loved ones, downloading pictures from your camera, shopping for Christmas presents online, recording your favorite television show every week. All of these things can make your life more efficient and enjoyable, and you'll be surprised how easily they can be learned when you have the right teacher.

*techprodigy™* offers competitive pricing and will work fast to get you up and running as soon as possible. With same-day service, you'll go from frustrated to fulfilled in no time flat.

You don't need to feel like you're being left behind any longer. Anthony's technicians will bring technology into your life on terms that you're comfortable with.

To get a quote for an on-site visit and book your appointment call 1-87-PRODIGY-7 (1-877-763-4497).
