LIGHT UP THE SKY WITH SOMETHING SPECIAL!

By Bill Finley

When we Americans celebrate big holidays, like the 4th of July and other patriotic holidays, we must have

food, drink and fireworks to really celebrate. Even though it is not so easy to like the Chinese these days, we

should be grateful for their invention of fireworks. No, the Italians only set them off!

Fireworks are an international, non-partisan wasteful method of lighting up the sky in colors we would never otherwise see and blasting our eardrums with cannonades of explosions. From tots to wobblers, almost everyone truly oohs and aahhs at the multiple explosions of stars, fountains and circles in the night.

From cakes with candles to chocolate martinis to bombardments in the sky, let's celebrate whatever will make us happy and appreciate our freedoms and memories.

Happy 4th!!!
