

The finest cancer care center in Palm Beach County isn't at a hospital. It's at a university.

Introducing The Cancer Institute at FAU Research Park.

Finally, we have a nationally-respected cancer center in Palm Beach County. And it's located right where you would expect to find a state-of-the-art cancer center—on the campus of a University. The Cancer Institute offers both low dose and high dose rate IMRT Brachytherapy and Tomotherapy Reverse IMRT radiosurgery. In fact, we are the only cancer center in Southeast Florida to offer both of these treatments using 3D Conformal Computer-Optimized technology, which is the most effective method for treating tumors.

We have more than just high-tech equipment. We have a modern, free-standing center that's comfortable and staffed with a very capable team of cancer specialists. The Cancer Institute is led by Dr. Bruce Horowitz, the only doctor in Palm Beach County with a fellowship in Brachytherapy from the world-renowned Memorial Sloan Kettering Cancer Center in New York City and 20 years experience in this technology.

Now you have access to world-class cancer care in Palm Beach County. Best of all, you don't have to go to the hospital to find it.

Dr. Bruce Horowitz, Medical Director and Board Certified by the American Board of Radiology

The Cancer Institute

AT FAU RESEARCH PARK IN BOCA RATON

3651 FAU Boulevard • Boca Raton, FL 33431

561-347-8001

WE ARE THE BEST...because

We are the only center in Southeast Florida to have all of these:

- Tomotherapy IMRT (External body radiosurgery)
- HDR & LDR IMRT Brachytherapy (Implant Seed radiosurgery)
- Sloan Kettering Fellowship Trained Physician
